

DPW Highway Division Receives New Vehicle

The Northbridge DPW Highway Division recently took delivery of a new Ford F-350 Heavy Duty 4-wheel drive one-ton pickup truck with plow. The vehicle was purchased with a portion of a \$40,000 cash gift made to the Department by W/S Development Associates LLC of Chestnut Hill, Massachusetts, the developers of the Wal-Mart shopping center on Main Street.

The new vehicle will be used on a daily basis to transport personnel, tools and equipment to various job sites around town. Equipped with an 8-foot snow plow it will be a welcome addition to the town's aging fleet of snow removal equipment. It will replace another pickup truck that is fourteen years old and badly in need of replacement.

The Department looks forward to many years of reliable service to the Town.
