

SUGGESTED CURBSIDE MAILBOX INSTALLATION

The Town of Northbridge is not responsible for damage to curbside mailboxes resulting from snow and slush from snowplows. The U. S. Postal Service recommends that Cantilever Mailbox Supports be used in areas where snow plowing is needed. Below are two suggested designs furnished by the Postal Service for cantilever mailbox supports. The design on the left uses pipe supports while the design on the right uses wood supports. The mailbox should be located according to Postal Service requirements. (Drawing taken from Postal Bulletin 22102 5-15-03)

Cantilever Mailbox Supports
