

Announcing Community Solar Opportunity in Northbridge:
Expanding Access to the Benefits of Solar

The Town of Northbridge is supporting homegrown clean energy sources and saving on its facilities' electricity costs by purchasing solar net metering credits from Nexamp, the veteran-founded and Massachusetts-based solar provider.

Now, we are happy to share the opportunity throughout the Northbridge community. Through Nexamp's *Solarize My Bill* Community Solar program, local households and businesses can take advantage of the environmental and economic benefits of going solar without installing solar panels on their property. By subscribing to a share of the clean electricity generated by a local community solar project, participants can save 15% on electricity costs* with no upfront investment or long-term commitment.

To learn more about how you can save while supporting local sources of renewable energy, visit SolarizeMyBill.com or call **800-945-5124** to speak with a member of the Nexamp Community Solar team. Spots are limited, and Nexamp is enrolling participants on a first-come, first-serve basis.

How it Works:

- **Guaranteed 15% discount** on solar credits for up to 20 years
- **No installation** or maintenance of any equipment on your property
- **No sign-up costs**, no long-term commitment, and no service fees

*Note: These savings would be applied *in addition* to discounted electricity supply rates from the ConEd Electricity Aggregation program. Customers must opt-in to Community Solar to receive these additional savings, so any interested individuals should contact Nexamp at SolarizeMyBill.com or **800-945-5124**.
