Phase I Environmental Site Assessment 44 Cross Street Whitinsville, Massachusetts Langan Project No.: 1501321201

EXECUTIVE SUMMARY

Langan Engineering and Environmental Services, Inc. (Langan) has completed a Phase I Environmental Site Assessment (ESA) of the property at 44 Cross Street in the Village of Whitinsville, Town of Northbridge, Worcester County, Massachusetts (referred to herein as the "Subject Property". The Subject Property consists of the 2.5-acre parcel identified by the Town of Northbridge, MA Parcel ID 14A-160. The Subject Property is improved with an approximately 33,400-square-foot (sf) one-to-three story vacant elementary school (Building 1) and an approximately 2,700-sf three-story office building (Building 2). Building 1 was most recently occupied by Northbridge Elementary School until the end of the 2021 school year. Building 2 is currently used for Administrative Offices for the Northbridge Public Schools. Based on review of historical sources, the Subject Property was formally undeveloped until construction of Building 1 and Building 2 occurred in 1952 and 1875, respectively. Building 1 was historically occupied by Saint Patrick's Parochial School and Building 2 was occupied by a convent.

According to the Town of Northbridge Property Report Card, the Subject Property is currently owned by the Town of Northbridge. A Site Location Map and Site Layout Map are provided as Figures 1 and 2, respectively. The Subject Property is bound to the north by an asphalt-paved parking lot followed by retail/commercial properties; to the east by Cross Street followed by the Pleasant Street Church and residential properties; to the south by Linwood Avenue followed by a tire shop and residential properties; and to the west by residential properties and the United Methodist Church.

This Phase I ESA was conducted in accordance with of the ASTM International (ASTM) Standard Practice E1527-13 (Standard Practice for ESA: Phase I ESA Process) and the USEPA's All Appropriate Inquiry (AAI) Rule. The objective of this Phase I ESA was to identify the presence or likely presence, use, or release on the Subject Property of hazardous substances or petroleum products, as defined in ASTM E1527-13 as a REC, Controlled REC (CREC), or Historical REC (HREC).

The Phase I ESA identified the following RECs associated with the Subject Property:

• REC-1: Abandoned Underground Storage Tank (UST)/Former UST at Subject Property: Langan observed evidence of a UST in the landscaped area to the east of Building 1. A concrete pad with a manhole cover was observed, and when uncovered, oily water and a fuel like odor was noted. An approximately 2-inch diameter vent pipe was observed to the northwest of the manhole cover. According to conversations with Mr. Jamie Luchini, the Director of Public Works with the Town of Northbridge, the oil tank has been abandoned. Additionally, Langan observed permits for a former 500-gallon fuel oil UST located in the basement of Building 2. According to the permits, the UST was installed in July 1975. There was no evidence of the UST in the basement of Building 2. UST removal documents or Closure Reports were not provided for review for either of the USTs at the Subject Property and none are on file in public offices. That status of the abandoned UST near Building 1 is unknown

and it is unclear if the UST located in the basement of Building 2 was properly removed, or if residual contamination was left in the subsurface. Potential releases of oil and/or hazardous materials may have impacted the subsurface conditions at the Subject Property, and is therefore considered a REC.

• REC-2: Historical Use of Surrounding Property: Historical operations of a northern surrounding property, located in the inferred hydraulically upgradient property direction, include a dry cleaner. According to the Environmental Data Resources, Inc. (EDR) Report for the Subject Property, a dry cleaner was in operation approximately 400 feet north of the Subject Property in 1969 and 1970. While no associated release or violations were identified during the review of historical records and no Resource Conservation and Recovery Act (RCRA) hazardous waste generator listings were identified at the facility, releases of chlorinated solvents potentially used at the facilities may have impacted soil, groundwater, and/or soil gas at the Subject Property. Due to the facilities proximity to the Subject Property and its inferred hydraulically upgradient direction, the northern surrounding property is considered a REC.

The Phase I ESA identified the following de minimis condition associated with the Subject Property:

• **De Minimis Condition–1: Interior Staining:** De minimis staining was observed on the concrete floor in the boiler/mechanical room in the eastern portion of Building 1 and in the basement of Building 2. Areas of staining were not more than 5-square-feet and did not extend to floor drains. The concrete appeared to be in good condition with no visible cracks or pitting.

No HRECs, CRECs or Business Environmental Risks (BERs) were identified in association with the Subject Property.

1.0 INTRODUCTION

Langan Project No.: 1501321201

1.1 Purpose

The purpose of this Phase I ESA is to:

- 1. Identify Recognized Environmental Conditions (RECs) in connection with the Subject Property, as defined in the ASTM International (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E1527-13.
 - A REC is defined as: "The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not considered RECs."
 - De minimis conditions are further defined as conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.
 - A Historical REC (HREC) is defined as follows: "A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."
 - A Controlled REC (CREC) is defined as follows: "A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."
 - A Business Environmental Risk (BER) is not considered a REC, but is defined as
 "a risk that can have a material environmental or environmentally-driven impact
 on business associated with the current or planned use of a parcel of
 commercial real estate."

2. Provide services consistent with the United States Environmental Protection Agency's (USEPA) All Appropriate Inquiries (AAI) Rule 40 Code of Federal Regulations (CFR) §312.20.

1.2 Detailed Scope of Services

The assessment consisted of a reconnaissance of accessible areas of the Subject Property, a review of state and federal environmental databases as they pertain to the Subject Property and surrounding properties, a review of historical aerial photographs, topographic maps, Sanborn Fire Insurance Maps, and city directories for the Subject Property and surrounding properties, and a review of local and state records.

1.3 Significant Assumptions

Any deviations from the ASTM E1527-13 Standard Practice are provided in Section 8.0 of this report.

1.4 Limitations and Exceptions

This Phase I ESA report was prepared for The Town of Northbridge (the "User") for 44 Cross Street, Village of Whitinsville, Town of Northbridge, Massachusetts, and is intended to be used in its entirety for due diligence purposes. This report may also be relied upon by the affiliates of the User. Excerpts taken from this report are not necessarily representative of the assessment findings. Langan cannot assume responsibility for use of this report for any property other than the Subject Property addressed herein, or by any third party without a written authorization from Langan.

Langan's scope of services was limited to that agreed with the User and no other services beyond those explicitly stated are implied.

This Phase I ESA was not intended to be a definitive investigation of possible environmental impacts at the Subject Property. The purpose of this assessment was limited to determining if there is reason to suspect the possibility of RECs at the Subject Property. It should be understood that even the most comprehensive Phase I ESA may fail to detect environmental liabilities at a particular site. Therefore, Langan cannot "ensure" or "certify" that the Subject Property is free of environmental impacts. No expressed or implied representation or warranty is included or intended in this report, except that our services were performed, within the limits prescribed by our client, with the customary thoroughness and competence of our profession. The User is cautioned that Federal, State, and local laws may impose environmental obligations that are beyond the scope of ASTM E1527-13.

The conclusions, opinions, and recommendations provided in this report are based solely on the following activities:

- Visual observations of accessible portions of the Subject Property and the immediate vicinity at the time of Langan's site visit;
- Review of relevant available historical information; and,

• Correspondence and/or discussion with personnel knowledgeable about the Subject Property.

The conclusions, opinions and recommendations are intended exclusively for the purpose stated herein, at the specified Subject Property, as it existed at the time of our site visit.

The User is asked to provide information regarding environmental liens, activity and use limitations, and provide reasons for significantly lower purchase property price in accordance with Section 6 of ASTM E1527-13. A questionnaire covering these potential concerns was provided to the User/Client and Owner/Operator; however, the completed questionnaires has not been received by Langan. Should any information be provided at a later date that alters the conclusions of this Phase I ESA, Langan will issue an addendum to the report.

The report findings are based in part on information provided by local and state officials and environmental databases from federal and state sources. Langan assumes no responsibility for the accuracy and completeness of this information. Visual observations discussed in this report represent conditions at the time of the site reconnaissance and may not be representative of the past or future site conditions.

As per ASTM E1527-13, ESA report deviations as well as professional opinions regarding these deviations are listed in Section 8.0.

1.5 User Reliance

This ESA has been prepared for the sole use of our client, The Town of Northbridge, for the referenced Subject Property, subject to Langan's General Terms and Conditions. The report was prepared in accordance with applicable, customary and generally accepted professional and technical standards ordinarily exercised by other engineering professionals providing similar services under similar circumstances in the location and at the time the subject services were provided and the report prepared. Langan makes no representations or warranties regarding compliance with any other standard. Reliance upon the report is subject in all respects to this section, the conditions set forth in this report and Langan's General Terms and Conditions applicable to the report, including but not limited to Sections J, L, and N pertaining to limitations of liability, claim procedures, and identification of projects. This ESA should not be relied upon by other parties without the express written consent of Langan.

In accordance with Section 4.6 of ASTM E1527-13 and 40 CFR §312.20, a Phase I ESA may be considered valid for one (1) year starting from the date of the assessment listed on the front cover of this report. The following components must be conducted or updated within 180 days (6 months) prior to the date of any property acquisition/real estate transaction in order for the Phase I ESA to be considered valid per ASTM E1527-13:

- Interviews with past and present owners, operators and occupants;
- Searches for recorded environmental cleanup liens;
- Review of governmental records;
- Site reconnaissance of the property and adjoining properties; and,

• The declaration by the Environmental Professional.

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 Location and Legal Description

The Subject Property consists of the 2.5-acre parcel identified by the Town of Northbridge, MA Parcel ID 14A-160. The Subject Property is improved with an approximately 33,400-squre-foot one-to-three story vacant elementary school (Building 1) and an approximately 2,700-sf three-story office building (Building 2). Building 1 was most recently occupied by Northbridge Elementary School until the end of the 2021 school year. Multiple classrooms, bathrooms, administrative offices, nurses' offices, a gymnasium, a cafeteria/auditorium, and mechanical rooms were observed within Building 1. Building 2 is currently used as Administrative Offices for the Northbridge Public Schools. Multiple offices and a basement containing mechanical equipment were observed within Building 2. Asphalt-paved parking lots are located to the south of Building 1 and to the east of Building 2. A children's playground is also located to the north of Building 2. Landscaped areas occupy the remaining portions of the Subject Property.

According to the Town of Northbridge, Massachusetts Zoning Map dated October 2018, the Subject Property is located in the Heritage (H) zoning district. According to the Zoning Bylaws, the purpose of the Heritage Zoning District is to preserve and reinforce the visual and historical character of the Memorial Square Area of the Town of Northbridge by regulating the type and intensity of uses, which may be proposed within it.

According to the 2018 United States Geological Survey (USGS) Uxbridge Quadrangle 7.5-minute Series Topographic Map, the Subject Property is situated at an elevation of approximately 300 feet above mean sea level (msl).

Adjoining and surrounding property usage is summarized in the following table:

Direction	Adjoining Properties	Surrounding Properties	
North	Landscaped areas and asphalt-paved	Residential and	
	parking lot (22 Cross Street)	Commercial/Retail Properties	
	Cross Street		
	Pleasant Street Church (33 Cross Street)		
East	Residential Property (43 Cross Street)	Residential Properties	
	Residential Property (51 Cross Street)		
	Residential Property (121 Linwood Ave)		
South	Linwood Avenue	Mumford River and	
South	Crothers Tire Co, Inc. (110 Linwood Ave)	Residential Properties	
South	Residential Property (94 Linwood Ave)	Mumford River and	
South	Residential Property (88 Linwood Ave)	Residential Properties	
West	Residential Property (79 Linwood Ave)	United Methodist Church	

2.2 Description of Subject Property Improvements/Site Features

Improvements and site features observed at the Subject Property are summarized in the following table:

SUBJECT PROPERTY IMPROVEMENTS		
Size of the Subject Property	2.5-acres	
Buildings/Spaces/Structures	Building 1: 33,400-sf one-to-three story vacant elementary school Building 2: 2,700-sf three-story office building	
Potable Water Source	Provided by the Town of Northbridge	
Sanitary and Storm Sewer Utilities	Provided by the Town of Northbridge	
Electrical Utilities	Provided by National Grid	
Natural Gas Utilities	Provided by Eversource	
Construction Completion Date	Building 1: 1952 with an addition in 1983 and a remodel in 1998 Building 2: 1875 with a remodel in 1982	
General Construction Type	Building 1: Brick and pre-fabricated wood exterior walls, masonry frame, wood and drywall/sheetrock interior walls, flat asphalt shingle roof, and vinyl interior floors Building 2: Clapboard siding exterior walls, wood frame, drywall/sheetrock interior walls, gable asphalt shingle roof, and carpeted interior floors	
Heating System Type	Natural-gas fueled forced air	
Emergency Power	None	

2.3 Physical Setting Sources

2.3.1 Flood Plain Information

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map 25027C1006E, the Subject Property is not mapped within the 100-year (1% chance of annual flood) or the 500-year (0.2% chance of annual flood) flood zones.

2.3.2 Geology

According to the Bedrock Geologic Map of Massachusetts (USGS, 1983), the Subject Property is located within the Milford-Dedham Zone and is underlain with Scituate Granite Gneiss. This geology is classified as gneissic granite containing biotite in small clots. Bedrock outcrops were not observed during our site visit.

According to the United States Department of Agriculture (USDA) National Resources Conservation Services (NRCS) Web Soil Survey, soils as the Subject Property generally consist of Hinckley soils, which is described as soils with gravelly loamy sand.

2.3.3 Hydrogeology

Groundwater flow in unconsolidated deposits is typically topographically influenced, as shallow groundwater tends to originate in areas of topographic highs and flow towards areas of topographic lows, such as rivers, stream valleys, ponds, and wetlands. A broader, interconnected hydrogeologic network often governs groundwater flow in the bedrock aquifer. Groundwater depth and flow direction are also subject to hydrogeologic and anthropogenic variables such as precipitation, evaporation, extent of vegetation cover, and coverage by impervious surfaces. Other factors influencing groundwater include depth to bedrock, the presence of artificial fill, and variability in local geology and groundwater sources or sinks.

The closest body of water to the Subject Property is the Mumford River, which is located approximately 420 feet south of the Subject Property. Based on the surrounding topography and proximity of surface water bodies to the Subject Property, groundwater at the Subject Property is inferred to generally flow to the south.

According to the National Wetlands Inventory (NWI) Surface Waters and Wetlands online map and the EDR Report for the Site (Appendix E), there are no mapped wetlands at the Subject Property.

3.0 USER PROVIDED INFORMATION

3.1 User/Client and Owner/Operator/Site-Manager Questionnaires

Mr. Adam Gaudette, Town Manager with the Town of Northbridge, MA, completed the User/Client questionnaire. Mr. Gaudette indicated that the Type of Property Transaction was for sale of the Subject Property. Mr. Gaudette reported no knowledge of environmental liens that are filed or recorded against the property; activity and use limitations that are in place on the property or that have been filed or recorded against the property; or commonly known of reasonably ascertainable information about the property.

Mr. Jamie Luchini, Town of Northbridge Department of Public Works Director, completed the Owner/Operator questionnaire; Mr. Luchini indicated that he was the Operator of the Subject Property. Mr. Luchini reported no knowledge of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property; or any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products. Mr. Luchini was unaware of any registrations for underground

storage tanks (USTs) or aboveground storage tanks (ASTs), environmental reports, or environmental permits.

3.2 Title Records and Environmental Liens / Use Limitations

Reasonably ascertainable recorded land title records and lien records that are filed under federal, tribal, state, or local law should be reviewed to identify environmental liens or activity and use limitations, if any, that are currently recorded against the property. Known environmental liens or activity and use limitations should be reported to the Environmental Professional conducting the ESA per ASTM E1527-13.

As of the date of this report, title records or environmental liens / use limitations records have not been provided to Langan.

3.3 Reason for Performing Phase I ESA

This Phase I ESA was conducted at the request of The Town of Northbridge for the sale of the property.

4.0 RECORDS REVIEW

4.1 Previous Environmental Reports/Documents

No previous environmental reports were provided for review.

4.2 Federal and State Database Findings

A database search report that identifies sites listed on federal and state databases within the ASTM-required radii was obtained for the Subject Property from Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut. A copy of EDR's complete report is provided as Appendix C.

The report included the following databases specified by the ASTM Phase I ESA protocol, as well as non-ASTM databases (not listed):

Database Record Summary			
Database Reviewed (Date of government version)	Minimum Search Area	Subject Property listed? (No. of listings)	Number of Sites Within Minimum Search Area
STANDARD ENVIRONMENTAL RECORDS			
Federal NPL site list	1 Mile Radius	No	0
Federal Delisted NPL site list	½ Mile Radius	No	0
Federal CERCLIS list	½ Mile Radius	No	0
Federal CERCLIS NFRAP site list: SEMS-ARCHIVE	½ Mile Radius	No	0
Federal RCRA CORRACTS facilities list	1 Mile Radius	No	1
Federal RCRA non-CORRACTS TSD facilities list	½ Mile Radius	No	0
Federal RCRA generators list: RCRA-LQG	¼ Mile Radius	No	0
Federal RCRA generators list: RCRA-SQG	¼ Mile Radius	No	0

Database Record Summary			
Database Reviewed (Date of government version)	Minimum Search Area	Subject Property listed? (No. of listings)	Number of Sites Within Minimum Search Area
Federal RCRA generators list: RCRA-VSQG	¼ Mile Radius	No	1
Federal institutional control/engineering control registries	½ Mile Radius	No	0
Federal ERNS list	Subject Property	No	0
State and tribal lists of hazardous waste sites identified for investigation or remediation: MA SHWS	1 Mile Radius	No	20
State and tribal landfill and/or solid waste disposal site lists	½ Mile Radius	No	1
State and tribal leaking storage tank lists: MA LUST	½ Mile Radius	No	5
State and tribal leaking storage tank lists: MA LAST	½ Mile Radius	No	0
State and tribal registered storage tank lists: MA UST	¼ Mile Radius	No	6
State and tribal registered storage tank lists: MA AST	¼ Mile Radius	No	2
State and tribal institutional control/engineering control registries	½ Mile Radius	No	5
State and tribal voluntary cleanup sites	½ Mile Radius	No	0
State and tribal Brownfield sites	½ Mile Radius	No	1
ADDITIONAL ENVIRONMENTAL RECORDS			
Other Ascertainable Records: RCRA NonGen/NLR	¼ Mile Radius	No	6
Other Ascertainable Records: MA HW GEN	¼ Mile Radius	No	5
Other Ascertainable Records: NY Manifest	¼ Mile Radius	No	1
EDR High Risk Historical Records: EDR Historic Auto	1/8 Mile Radius	No	6
EDR Exclusive Records: EDR Historic Cleaner	1/8 Mile Radius	No	1

A description of these databases is provided in the EDR report. A complete listing of sites identified on the above-referenced databases is provided in the EDR Report.

Subject Property

The Subject Property was not listed in the federal and state standard source environmental databases.

Adjoining Properties

The EDR report contains a listing of sites identified on select federal and state standard source environmental databases within the approximate search radius specified by ASTM E1527-13. Langan reviewed each environmental database to determine if certain sites identified in the report are suspected to represent a potential impact to the Subject Property. Langan also reviewed "Orphan Sites" listed within the report. Orphan Sites are those sites that could not be mapped due to inadequate address information. Orphan Sites that were identified by Langan within the ASTM search radii, either during the Subject Property

reconnaissance, internet research or by cross-referencing to mapped listings, are addressed in the discussion below.

<u>Southern Adjoining – Harbro Service Station and Crothers Tire Company, Inc. (92, 110 and 112 Linwood Avenue – inferred hydraulically downgradient)</u>

Harbro Service Station

The facility is listed in the EDR Historic Auto database from 1973 to 1978 as a gasoline service station.

Crothers Tire Company, Inc.

The facility is listed in the EDR Historic Auto database in 1972 as a fuel oil dealer; in 1979, 1980, and 1990 through 1992 as a general automotive repair shop; in 1985 through 1988 as a gasoline service station; and in 1993 through 2014 as an auto and home supply store.

The facility is listed in the MA UST Database in association with a 3,000-gallon gasoline UST that was installed at the facility on April 24, 1952, and removed from the facility on September 9, 1988. No leaks were identified in association with this tank.

Due to the nature of the listings, lack of violations and the downgradient direction to the Subject Property, this facility is not considered a REC.

Surrounding Properties

Based on our review of surrounding area property listings, most of the nearby listings were either: (1) closed by the regulatory agency, (2) located in the inferred hydrologically downgradient direction from the Subject Property, (3) confirmed to be a significant distance from the Subject Property and/or (4) considered not to have a potential impact on the Subject Property based on our review of available database information.

<u>Delaney Fuel Transport, LLC – approximately 310 feet west and inferred hydraulically cross</u> gradient (52 Linwood Avenue)

The facility is listed in the MA SHWS, Enforcement Action Cases (MA ENF), and Reportable Releases (MA Release) databases in association with MassDEP Release Tracking Number (RTN) 2-20576. Information regarding this release was accessed from the MassDEP Environmental and Energy Affairs (EEA) online database. RTN 2-20576 was issued to the facility on July 2, 2018 for the release of an unknown amount of gasoline from a tractor-trailer following the truck veering off course and landing on the residential property at 52 Linwood Avenue. Immediate Response Actions (IRA) activities were completed which included the use of a spill containment pool and off-site disposal of 50 gallons of diesel fuel gasoline captured in the pool. Absorbent materials were also placed around the release area, but no fuel reportedly reached these materials. The release achieved regulatory closure with a Permanent Solution with No Conditions Statement on March 1, 2019.

Due to the regulatory closure of the release, the release at 52 Linwood Avenue is not considered a REC.

<u>Muradian Cleaners – approximately 400 feet north and inferred hydraulically upgradient (105 Church Street)</u>

The facility is listed in the EDR Historic Cleaner database in 1969 and 1970 as a dry-cleaning plant, except rugs. The address at 105 Church Street appeared to be vacant during Langan's October site reconnaissance.

While no specific incidents related to the facility at 105 Church Street were apparent during the review of historical records and no RCRA hazardous waste generator listings were identified for the facility, dry cleaning activities have the potential to cause contamination and can cause vapor intrusion concerns in overlying buildings. There is no direct evidence that past or current contamination associated with the facility has impacted the Subject Property; however, the facilities proximity and its inferred hydraulically upgradient direction to the facility is considered a REC.

<u>Unibank for Savings – approximately 530 feet northwest and inferred hydraulically upgradient (49 Church Street)</u>

The facility is listed in the MA SHWS, MA Release, MA ENF, and Sites with Activity and Use Limitation (Inst. Control) databases in association with MassDEP RTNs 2-10845 and 2-15764. Information regarding these releases was accessed from the MassDEP EEA online database.

RTN 2-10845 was issued to the facility on July 10, 1995 for the discovery of petroleum impacted soil and groundwater associated with a former foundation that was located at the facility. Subsurface investigations were completed at the facility to evaluate the nature and extent of contamination, and concentrations of total petroleum hydrocarbons (TPH) existed in one confirmatory soil sample taken from beneath the former foundation. The release reached regulatory closure with a Class A-3 Response Action Outcome (RAO) Statement on July 3, 1996. A Class A-3 RAO is applicable to a site where a condition of No Significant Risk (NSR) exists for the site; however, the level of oil and hazardous material in the environmental has not been reduced to background and an Activity and Use Limitation (AUL) is required to maintain a level of NSR. The AUL was filed for the facility on July 3, 1996 and restricted excavation of soils below the level of the concrete slab encountered at 10 feet below grade.

RTN 2-15764 was issued to the facility on May 23, 2005 after encountering approximately three feet of demolition rubble and suspected contaminated soil during construction for an addition to the bank building. A composite soil sample was collected and analytical results yielded concentrations of one polycyclic aromatic hydrocarbon (PAH) above MassDEP Reportable Concentrations for Soil – 1 (RCS-1). Soil excavation was proposed; however, due to the AUL placed on the site (mentioned above), excavation could not be conducted to eliminate the PAH contamination. As such, a Method 1 Risk Characterization was conducted and a condition of NSR exists for the site. The facility reached regulatory closure with a Class A-2 RAO Statement on July 26, 2005. A Class A-2 RAO is applicable to a site where a Permanent Solution has been achieved, a condition of NSR to human health, public welfare, safety and the environment exists, and contamination has not been reduced to background.

Whitinsville, Massachusetts Langan Project No.: 1501321201

Due to the regulatory closure of the release, the facility at 49 Church Street is not considered a REC.

<u>Crystal Gas, Inc./Sunoco Service Station – approximately 800 feet northeast and inferred hydraulically upgradient</u>

Crystal Gas, Inc.

The facility is listed in the MA SHWS, MA Release, MA UST, and MA LUST databases. The MA UST listing is associated with four 4,000-gallon waste oil USTs installed on April 23, 1959 and removed on July 2, 1987; one 550-gallon waste oil UST installed on April 23, 1959 and removed on July 2, 1987; two 6,000-gallon gasoline USTs installed on July 2, 1987 and removed on September 20, 2017; one in-use 2,000-gallon gasoline UST installed on September 26, 2017; and, one in-use 6,000-gallon gasoline UST installed on September 26, 2017.

The MA SHWS and MA Release listings are associated with MassDEP RTNs 2-17903, 2-20257, and 2-20315. The MA LUST listing is associated with RTN 2-20315. Information regarding these releases was accessed through the MassDEP EEA online database.

RTN 2-17903 was issued to the facility on June 14, 2010 for the release of approximately 50-gallons of gasoline onto concrete and asphalt pavement. Granular absorbent and sand was applied to the release area and the impacted roadway to reduce hazards. The release reached regulatory closure with a Class A-1 RAO Statement on July 30, 2010. A Class A-1 RAO applies to a site where a Permanent Solution has been achieved and contamination has been reduced to background or a threat of release has been eliminated.

RTN 2-20257 was issued to the facility on July 14, 2017 following the detection of gasoline-related parameters in groundwater above MassDEP Reportable Concentrations for Groundwater – 2 (RCGW-2) standards prior to UST removal activities. A Release Abatement Measure (RAM) Plan was submitted for the facility to remediate RTN 2-20257; however, during removal activities associated with the UST at the facility, an elevated total organic vapor (TOV) reading was encountered in a post-excavation soil sample. This triggered a reporting condition to MassDEP and RTN 2-20315 was subsequently issued to the facility, and linked with RTN 2-20257. IRA and RAM activities were completed at the facility and included removal of the USTs, excavation of impacted soils, and collection and submission of post-excavation soil samples and groundwater samples for laboratory analysis. The analytical results of the soil and groundwater samples were well below the Method 1 Risk Characterization Standards. The facility reached regulatory closure with a Permanent Solution with No Conditions Statement on July 14, 2020.

Sunoco Service Station

The facility is listed in the RCRA-NonGen/NLR database in association with EPA ID MAD000638320. The facility last entered the database on August 18, 1980. No violations were noted. The facility is also listed in the FINDS and ECHO databases under EPA Registry ID 110006499529 in association with MA Environmental Protection Integrated Computer

System (EPICS) ID 399419 and RCRA Information System ID MAD000638320. No violations were noted.

Due to the regulatory closure of the releases and the lack of violations, the facility at 175 Church Street is not considered a REC.

Orphan Properties

According to EDR, an orphan listing is a property that cannot be mapped due to poor or inadequate address information. Upon further research, Langan concluded that the five orphan listings are not considered properties of concern for one or more of the following reasons: (1) closed by the regulatory agency, (2) located in the inferred hydrologically crossor down-gradient direction from the Site, (3) confirmed to be a significant distance from the Site, and/or 4) considered not to have a potential impact on the Site based on our review of available regulatory database information.

4.3 Federal, State, and Local Regulatory Agency Findings

Federal, state, and local agencies were contacted via online requests and email correspondence regarding records of environmental concerns, violations, and/or permits. A listing of agencies/individuals contacted by Langan as part of this ESA is provided below. Relevant records provided by the below-listed entities are provided in Appendix H.

4.3.1 USEPA

On September 28, 2022, Langan performed a search of the USEPA's online MyProperty, Multisystem Search, MyEnvironment and Facility Registry System (FRS) Query search engines for environmental information related to the Subject Property. The Subject Property as 44 Cross Street was not listed in any of the databases searched.

4.3.2 MassDEP EEA Online Databases

A review of the MassDEP EEA Online Database was performed on October 19, 2022. The address at 44 Cross Street was not listed in the Permits, Facilities, Inspections, Enforcements, Asbestos, Well Drilling, and Waste Site & Reportable Releases databases.

4.3.3 Northbridge Fire Department

On September 27, 2022, Langan requested environmental records from the Northbridge Fire Department via email. As of the date of this report, Langan has not received correspondence back from the Northbridge Fire Department.

4.3.4 Northbridge Board of Health

On September 27, 2022, Langan requested environmental records from the Northbridge Board of Health via email. On September 27, 2022, Langan received an email from the Administrator with a copy of an asbestos abatement form. According to the form, approximately 10-linear-feet (If) of piping insulation and 30-sf of boiler,

duct or tank surface coating was removed from the Subject Property from September 18, 2001 through September 21, 2001.

4.3.5 Northbridge Assessor's Office

On September 27, 2022, Langan requested environmental records from the Northbridge Assessor's Office via email. On September 27, 2022, Langan received an email from the Principal Assessor with a copy of the official property report card for the Subject Property.

4.3.6 Northbridge Conservation Commission

On September 27, 2022, Langan requested environmental records from the Northbridge Conservation Commission via email. On September 28, Langan received an email from a Conservation Agent stating the Conservation Commission does not have any records, submittals, or permits regarding the Subject Property.

4.3.7 Northbridge Town Clerk

On September 27, 2022, Langan requested environmental records from the Northbridge Town Clerk via email. On October 3, 2022, Langan received an email from the Town Clerk stating that they have reached out to multiple departments and there are no records pertaining to the Subject Property.

4.4 Historical Use Information on the Property

A review of historical topographic maps, aerial photographs, Sanborn Fire Insurance Maps, and city directory listings was conducted as part of this ESA to assess previous Subject Property usage.

Reference	Dates
Aerial Photographs	1938, 1952, 1960, 1966, 1975, 1985,

Photographs	

4.4.1 Subject Property

Based on a review of the above references, Subject Property use and other pertinent information is summarized below.

- Late 1880s to early-1950s: The earliest available records depict the Subject Property as undeveloped land (Historic Topographic Map 1889-1893). A two and a half floor residential building (Building 2) is first depicted in the southwestern corner of the Subject Property (Sanborn Maps 1910-1942). According to the Town of Northbridge Property Report Card and observations made from the site reconnaissance, Building 2 was constructed in 1875 to 1878. A series of driveways appear to lead to Building 2 from Linwood Avenue, and grassy areas with scattered trees compose the remainder of the Subject Property (Historical Aerial Imagery 1938).
- Early-1950s to early-1970s: Building 1 is first shown in aerial photographs from 1952 through 1975 in the eastern part of the Subject Property. According to the Town of Northbridge Property Report Card for the Subject Property, the southeastern portion of Building 1 was constructed in 1952. According to the 1960 Sanborn Map, Building 1 was occupied by Saint Patrick's Parochial School and Building 2 was functioning as a convent. The remainder of the Subject Property is generally unchanged. The Subject Property appears on the 1970 through 1989 City Directories as St. Patrick School, Clarke School, Cross Street School, Northbridge Primary School, and Northbridge Grammar School.
- Early-1970s to Present: By the mid-1980s, an extension to Building 1 was shown to the north of the existing structure. According to the Property Report Card and observations made during the site reconnaissance, the extension was completed in 1983. Parking lots were shown to the east of Building 2 and south of Building 1 in a historic aerial photograph from 1985. The Subject Property remains generally unchanged from 1985 to the most current aerial photograph in 2022; however, Building 1 was most recently functioning as the Northbridge Elementary School, until the end of the 2021 school year, and Building 2 is currently operating as the Administrative Offices for the Northbridge Public Schools. According to the Town of Northbridge Property Report Card, the Subject Property is owned by the Town of Northbridge.

Langan did not identify any RECs associated with historic use at the Subject Property.

4.4.2 Adjoining and Surrounding Properties

The earliest available records show the area surrounding the Subject Property developed with residential properties. In the 1903 Sanborn Map, Linwood Avenue is depicted adjoining the Subject Property to the south. The avenue is followed by residential buildings and Mumford River. Residential buildings and a church are

present to the west, and Cross Street followed by residential buildings are present to the east of the Subject Property. A greenhouse and residential buildings are located immediately north of the Subject Property until the greenhouse is demolished in the late-1930s to early-1940s (Historical Aerial Imagery 1938, Sanborn Map 1942).

According to a 1966 aerial photograph, by the mid-1960s, a tire shop was constructed south of Linwood Avenue, a parking lot was present north of the Subject Property, and the building currently housing Northbridge Middle School had begun construction east of residential buildings immediately east of Cross Street. According to the 1995 aerial photograph, by the mid-1990s, the middle school had been extended to its current configuration. The surrounding area remains generally unchanged from 1995 through the most recent record in 2022.

Environmental database listings associated with adjoining properties are discussed in Section 4.2 above. The Historical Topographic Maps, City Directory, Aerial Photographs and Sanborn Maps are located in Appendices F through I, respectively.

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

Langan Senior Staff Engineer Katherine Asciutto and Langan Staff Geologist Maura DiGuglielmo conducted a reconnaissance of the Subject Property on October 13, 2022. Ms. Asciutto and Ms. DiGuglielmo were accompanied by Mr. Paul Bessette, Working Foreman with the Town of Northbridge Department of Public Works. The weather at the time of the Subject Property reconnaissance was approximately 55 degrees Fahrenheit and cloudy/rainy. Photographs taken during the Subject Property reconnaissance are provided as Appendix A. The Subject Property reconnaissance included a walk-through of accessible interior and exterior portions of the Subject Property for identifying RECs.

The reconnaissance also included a visual inspection of adjoining properties from the Subject Property line, public rights-of-way, or other vantage points including a visual inspection where hazardous substances may be or may have been stored, treated, handled or disposed was also conducted.

5.2 General Subject Property Setting

The Subject Property consists of the 2.5-acre parcel identified by the Town of Northbridge, MA Parcel ID 14A-160. The Subject Property is improved with an approximately 33,400-squre-foot one-to-three story vacant elementary school (Building 1) and an approximately 2,700-sf three-story office building (Building 2). Building 1 was most recently occupied by Northbridge Elementary School until the end of the 2021 school year. Multiple classrooms, bathrooms, administrative offices, nurses' offices, a gymnasium, a cafeteria/auditorium, and mechanical rooms were observed within Building 1. Building 2 is currently used as Administrative Offices for the Northbridge Public Schools. Multiple offices and a basement containing mechanical equipment were observed within Building 2. Asphalt-paved parking

Whitinsville, Massachusetts Langan Project No.: 1501321201

lots are located to the south of Building 1 and to the east of Building 2. A children's playground is also located to the north of Building 2. Landscaped areas occupy the remaining portions of the Subject Property.

5.3 Polychlorinated Biphenyls (PCBs)

Langan observed pole-mounted transformers on electrical poles along Cross Street and Linwood Avenue. Electrical panels were observed in the mechanical/boiler room in the eastern portion of Building 1. Evidence of release or staining was not observed beneath these panels. Electrical panels appeared to be in good condition.

Air compressors and natural-gas fueled boilers were observed in the eastern portion of Building 1 and in the basement of Building 2. Minor staining was observed on the concrete flooring surrounding the units.

5.4 Petroleum-Containing Equipment

Langan observed evidence of a UST in the landscaped area to the east of Building 1. A concrete pad with a manhole cover was observed, and when uncovered, oily water and a fuel like odor was noted. Additionally, what appeared to be an approximately 2-inch diameter vent pipe was observed to the northwest of the manhole cover. Mr. Bessette did not have any information regarding this UST. According to Mr. Luchini, the Directory of Public Works, the oil tank has been abandoned. Mr. Luchini was unaware of the date that the school switched from oil to natural gas. Documentation regarding this UST was requested from the Northbridge Fire Department, but was not received as of the date of this report.

Langan observed permits for a former 500-gallon fuel oil UST located in the basement of Building 2. According to the permits, the UST was installed on July 28, 1975. There was no evidence of the UST in the basement. Closure documentation associated with this UST was requested from the Northbridge Fire Department, but was not received as of the date of this report.

The presence of an abandoned UST to the east of Building 1 and the lack of closure documentation surrounding the former UST in the basement of Building 2 are considered a REC as potential releases of fuel associated with regulated substances may have impacted the soil and/or groundwater quality at the Subject Property.

5.5 Hazardous Materials/Hazardous Waste

Multiple one-quart to one-gallon sized containers and bottles of typical household cleaning chemicals were observed in multiple rooms and closets throughout Building 1. These cleaners included white vinegar, hand sanitizer, antibacterial wipes, disinfectant spray, and all-purpose cleaner. The containers and bottles of cleaners were atop shelving units, and staining or evidence of release was not observed on the shelves or beneath the units.

Two quart-sized containers of compressor oil and motor oil were observed on top of metal cabinets in the boiler/mechanical room in the eastern portion of Building 2. Evidence of release or staining was not observed surrounding these containers.

Whitinsville, Massachusetts Langan Project No.: 1501321201

5.6 Pits, Ponds or Lagoons

No pits, ponds, or lagoons were observed on the Subject Property during the site reconnaissance.

5.7 Stained Soil or Pavement

Langan observed minor staining on the concrete flooring in the mechanical/boiler room on the eastern portion of Building 1 and in the basement of Building 2. Areas of staining were no more than 5 square feet (sf) and did not extend to floor drains. The concrete appeared to be in good condition with no visible cracks of pitting; therefore, the staining is considered a de minimis condition.

5.8 Stressed Vegetation

Stressed vegetation was not observed on the Subject Property during the site reconnaissance.

5.9 Drains, Catch Basins, Wells, Sumps or Cisterns

Floor drains were observed in bathrooms and within the mechanical/boiler room of Building 1; bathrooms were not observed in Building 2. Langan did not observe evidence of staining or releases near the floor drains.

Mop sinks were observed in janitorial closets in Building 1. The mop sinks appeared to contain general debris, such as dirt and. The concrete surrounding the mop sinks appeared to be dark in color, but did not exhibit any evidence of release.

Storm drains were observed in the driveway to the east of the entrance of Building 1 and in the courtyard area of Building 1,

No wells, storm drains, catch basins, or cisterns were observed at the Subject Property during the Site reconnaissance.

5.10 Septic System

The Subject Property does not use a septic system and Langan did not observe evidence of septic systems. The sanitary sewer system is provided by the Town of Northbridge.

5.11 Other Conditions at the Subject Property

Four general refuse trashcans were observed to the south of Building 1 and to the southwest of Building 2. Evidence of release or staining was not observed surrounding these units.

5.12 Adjoining Property Observations

A visual reconnaissance of the area surrounding the Subject Property was conducted as part of the Phase I ESA. The purpose of the reconnaissance was to observe general land use in the Subject Property area and confirm the location of the facilities identified on the environmental database search. The current operations on the adjoining properties are summarized in Section 2.1. Langan did not observe unidentified substance containers, odors,

pools of liquid likely to contain hazardous substances or petroleum products or unnatural fill areas on the adjoining properties.

6.0 INTERVIEWS AND QUESTIONNAIRES

6.1 Interview with Owner(s)/Tenant(s)

A questionnaire covering potential environmental concerns was provided to the User/Client and Owner/Operator. A summary of the response to the User/Client and Owner/Operator questionnaire is provided in Section 3.0 above.

Ms. Asciutto interviewed Mr. Paul Bessette, Working Foreman with the Town of Northbridge Department of Public Works, during the site reconnaissance. Mr. Bessette provided access to the interior spaces on the Subject Property and general utility knowledge for the Subject Property. Mr. Bessette was unaware of the presence of the abandoned UST to the east of Building 1 and current or past environmental issues at the Subject Property.

6.2 Interviews with Owner(s)/Tenant(s) of Adjacent Properties

Owners/tenants of adjacent properties were not interviewed as part of this Phase I ESA.

7.0 DEVIATIONS AND DATA GAPS

7.1 Deviations

Langan has performed a Phase I ESA of the Subject Property utilizing a standard of good commercial and customary practice that is consistent with ASTM E1527-13.

This Phase I ESA conforms to ASTM E1527-13 with the following deviations noted:

- A title report and lien search were not provided as part of this ESA; and
- Owners/tenants of adjacent properties were not interviewed.

Sufficient information has been provided from other data sources to render conclusions regarding the presence of RECs at the Subject Property. As such, this deviation is not expected to impact the overall conclusions of the Phase I ESA.

7.2 Data Gaps

In order to address data gaps, additional sources of information may be consulted. According to ASTM E1527-13, Section 8.3.2.3, "historical research is complete when either: (1) the objectives in 8.3.1 through 8.3.2.2 are achieved; or (2) data failure is encountered. Data failure occurs when all standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. If data failure is encountered, the report shall document the failure and, if any of the standard historical sources were excluded, give the reasons for the exclusion."

- A title report and lien search were not provided during completion of this Phase I ESA
- Responses to all of Langan's environmental records requests have not been received.

Sufficient information has been provided from other data sources to render conclusions regarding the presence of RECs at the Subject Property. If additional information is provided that impacts the conclusions of this report, an addendum will be issued.

8.0 FINDINGS/CONCLUSIONS

This Phase I ESA was conducted in accordance with of the ASTM Standard Practice E1527-13 (Standard Practice for ESA: Phase I ESA Process) and the USEPA's All Appropriate Inquiry (AAI) Rule. Langan did not identify any Controlled RECs (CREC) or Historical RECs (HREC).

The Phase I ESA identified the following RECs associated with the Subject Property:

- REC-1: Abandoned Underground Storage Tank (UST)/Former UST at Subject Property: Langan observed evidence of a UST in the landscaped area to the east of Building 1. A concrete pad with a manhole cover was observed, and when uncovered, oily water and a fuel like odor was noted. An approximately 2-inch diameter vent pipe was observed to the northwest of the manhole cover. According to conversations with Mr. Jamie Luchini, the Director of Public Works with the Town of Northbridge, the oil tank has been abandoned. Additionally, Langan observed permits for a former 500-gallon fuel oil UST located in the basement of Building 2. According to the permits, the UST was installed in July 1975. There was no evidence of the UST in the basement of Building 2. UST removal documents or Closure Reports were not provided for review for either of the USTs at the Subject Property and none are on file in public offices. That status of the abandoned UST near Building 1 is unknown and it is unclear if the UST located in the basement of Building 2 was properly removed, or if residual contamination was left in the subsurface. Potential releases of oil and/or hazardous materials may have impacted the subsurface conditions at the Subject Property, and is therefore considered a REC.
- REC-2: Historical Use of Surrounding Property: Historical operations of a northern surrounding property, located in the inferred hydraulically upgradient property direction, include a dry cleaner. According to the EDR Report for the Subject Property, a dry cleaner was in operation approximately 400 feet north of the Subject Property in 1969 and 1970. While no associated release or violations were identified during the review of historical records and no RCRA hazardous waste generator listings were identified at the facility, releases of chlorinated solvents potentially used at the facilities may have impacted soil, groundwater, and/or soil gas at the Subject Property. Due to the facilities proximity to the Subject Property and its inferred hydraulically upgradient direction, the northern surrounding property is considered a REC.

The Phase I ESA identified the following de minimis condition associated with the Subject Property:

• **De Minimis Condition–1: Interior Staining:** De minimis staining was observed on the concrete floor in the boiler/mechanical room in the eastern portion of Building 1

and in the basement of Building 2. Areas of staining were not more than 5-square-feet and did not extend to floor drains. The concrete appeared to be in good condition with no visible cracks or pitting.

No HRECs, CRECs or Business Environmental Risks (BERs) were identified in association with the Subject Property.

9.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

We, the undersigned, declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property as documented in Appendix I. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Katherine Asciutto, EIT Senior Staff Engineer

Kenneth J. Gendron, PG, LSP Senior Project Manager

10.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

The resumes of the Environmental Professionals are provided in Appendix I.

APPENDIX B

Questionnaires and Provided Documents

ASTM PRACTICE E 1527-13: USER/CLIENT QUESTIONNAIRE

Please complete the below form and return to Langan Engineering and Environmental Services, Inc.

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the User must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The User is defined as the party seeking to use Practice E1527 to complete an environmental site assessment of the property. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager. These inquiries must also be conducted by the EPA Brownfield Assessment and Characterization grantees. The User should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquires" is not complete.

General Information	
User/Client Name (s):	Town of porturnoge
Property Name:	"NES" = NONTHBRIDGE ELEMENTY SCHOOL
Address:	44 Cross Street
	WHITINSUILLE, MA 01588
Property Type:	VACANT SCHOOL
Type of Property Transa Purchase of Financing of Sale of pro Ground Lea Build to Su Other	of property of property perty ase it Lease
Reason Why Phase I ES	A is required: Discussive Purposes
Site Contact (s):	BMIE WELLIAI - 508.320.1662

Required Information

The citation at the end of each item (e.g. 40 CFR 312.XX) is the section of EPA's November 1, 2005 AAI Final Rule which discusses that item.

LANGAN

(1.) Environmental liens that are filed or recorded against the property (40 CFR 312.25). Did a search of recorded land title records (or judicial records, where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law? Note 1 – In certain jurisdictions, federal, tribal, state or local statutes or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.	Yes	No	Unaware
(2.) Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and (vi)).	Yes	No	Unaware
Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?			
(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).	Yes	No	Unaware
Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?			
(4.) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).	Yes	No	Unaware
(a.) Does the purchase price being paid for this property reasonably reflect the fair market value of the property? [If no, proceed to Part 5.]			
(b.) If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?			
(5.) Commonly known or reasonably known or reasonably ascertainable information about the property (40 CFR 312.30).	Yes	No	Unaware
Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of			
releases or threatened releases? For example, as user, (a.) Do you know the past uses of the property?			
(b.) Do you know of specific chemicals that are present or once were present at the property?			
(c.) Do you know of spills or other chemical releases that have taken place at the property?			
(d.) Do you know of any environmental cleanups that have taken place at the property?			
(6.) The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property are there any obvious	Yes	No	Unaware
indicators that point to the presence or likely presence of releases at the property?

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIFECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA) INFORMATION PROVIDED IN THIS REPORT. Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

Copyright 2022 by Environmental Data Resources, LLC. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, LLC, or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, LLC or its affiliates. All other trademarks used herein are the property of their respective owners.

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
A T F DAVIDSON CO IN	355 MAIN ST	W 1/2 - 1 (0.863 mi.)	<i>145</i>	194

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

MA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Protection's Solid Waste Facility Database/Transfer Stations.

A review of the MA SWF/LF list, as provided by EDR, has revealed that there is 1 MA SWF/LF site within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

MA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Protection's Summary Listing of all the Tanks Registered in the State of Massachusetts.

A review of the MA UST list, as provided by EDR, and dated 05/05/2022 has revealed that there are 6 MA UST sites within approximately 0.25 miles of the target property.

Lists of state and tribal brownfield sites

MA BROWNFIELDS: Under Massachusetts law, M.G.L. c. 21E is the statute that governs the cleanup of releases of oil and/or hazardous material to the environment. The Brownfields Act of 1998 amended M.G.L. c. 21E by establishing significant liability relief and financial incentives to spur the redevelopment of brownfields, while ensuring that the Commonwealth's environmental standards are met. Most brownfields are redeveloped with the benefit of liability protections that operate automatically under M.G.L. c. 21E.

A review of the MA BROWNFIELDS list, as provided by EDR, has revealed that there is 1 MA BROWNFIELDS site within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that there are 6 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste Code: D001

Waste Description: IGNITABLE WASTE

Waste Code: D003

Waste Description: REACTIVE WASTE

Waste Code: F001

Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING:

TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED

FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002. F004. AND F005: AND STILL BOTTOMS FROM THE RECOVERY OF THESE

SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003

Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL

ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL

ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT

MIXTURES.

Waste Code: F005

Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL

KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE,

2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF

THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F006

Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT

FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF

ALUMINUM.

Waste Code: F007

Waste Description: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Waste Code: F008

Waste Description: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM

ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F009

Waste Description: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING

OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F010

Waste Description: QUENCHING BATH RESIDUES FROM OIL BATHS FROM METAL HEAT TREATING

OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F01

Waste Description: SPENT CYANIDE SOLUTIONS FROM SLAT BATH POT CLEANING FROM METAL HEAT

TREATING OPERATIONS.

Hazardous Waste Summary:

Waste Code: D001

Waste Description: **IGNITABLE WASTE**

Waste Code: D003

REACTIVE WASTE Waste Description:

Waste Code:

Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING:

TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED

FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED

IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE

SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003

Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL

ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL

ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL

BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT

MIXTURES.

Waste Code: F005

Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL

KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE,

2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004: AND STILL BOTTOMS FROM THE RECOVERY OF

THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F006

WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT Waste Description: FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM;

(2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM

PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF

ALUMINUM.

Waste Code: F007

Waste Description: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Waste Code: F008

Waste Description: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM

ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F009

Waste Description: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING

OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Number of Days to Update: 20

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state and tribal brownfield sites

BROWNFIELDS: Completed Brownfields Covenants Listing

Under Massachusetts law, M.G.L. c. 21E is the statute that governs the cleanup of releases of oil and/or hazardous material to the environment. The Brownfields Act of 1998 amended M.G.L. c. 21E by establishing significant liability relief and financial incentives to spur the redevelopment of brownfields, while ensuring that the Commonwealth's environmental standards are met. Most brownfields are redeveloped with the benefit of liability protections that operate automatically under M.G.L. c. 21E.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Source: Drug Enforcement Administration

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Version Date: 2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Additional Panels in search area: FEMA Source Type

25027C1007E FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

UXBRIDGE YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

 MAP ID
 FROM TP
 GROUNDWATER FLOW

 Not Reported
 GROUNDWATER FLOW

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Massachusetts Geographic Information System (MassGIS) Datalayers

Source: Executive Office of Environmental Affairs

Telephone:

Public Water Supply Database

Telephone:

The Public Water Supply datalayer contains the locations of public community surface and groundwater supply sources and public non-community supply sources as defined in 310 CMR 22.00.

Areas of Critical Environmental Concern

Telephone:

The Areas of Critical Environmental Concern (ACEC) datalayer shows the location of areas that have been designated ACECs by the Secretary of Environmental Affairs. ACEC designation requires greater environmental review of certain kinds of proposed development under state jurisdiction within the ACEC boundaries. The ACEC Program is administered by the Department of Environmental Management (DEM) on behalf of the Secretary of Environmental Affairs. The Massachusetts Coastal Zone Management (MCZM) Office managed the original Coastal ACEC Program from 1978 to 1993, and continues to play a key role in monitoring coastal ACECs. Procedures for ACEC designation and the general policies governing the effects of designation are contained in the ACEC regulations (301 CMR 12.00). The ACEC datalayer has been compiled by MCZM and DEM and includes both coastal and inland areas.

EPA Designated Sole Source Aquifers

Telephone:

The Sole Source Aquifer datalayer was compiled by the Department of Environmental Protection (DEP) Division of Water Supply (DWS). Seven Sole Source Aquifers have been designated by the US Environmental Protection Agency (EPA) for Massachusetts. A Sole Source Aquifer (SSA) is an aquifer designated by US EPA as the sole or principal source of drinking water for a given aquifer service area; that is, an aquifer which is needed to supply 50% or more of the drinking water for that area and for which there are no reasonably available alternative sources should that aquifer become contaminated. The aquifers were defined by an EPA hydrogeologist.

Aquifers

Telephone:

MassGIS produced an aquifer datalayer composed of 20 individual panels, generally based on the boundaries of the major drainage basins. Areas of high and medium yield were mapped. This datalayer includes polygon attribute coding to help in the identification of areas in which cleanup of hazardous waste sites must meet drinking water standards, as defined in the Massachusetts Contingency Plan (MCP) (310 CMR 40.00000).

Non-Potential Drinking Water Source Areas

Telephone:

Non-Potential Drinking Water Source Areas (NPDWSA) are regulatory in nature representing one of many considerations used in determining the standards to which ground water must be cleaned in the event of a release of oil or hazardous material. NPDWSAs are not based on existing water quality and do not indicate poor ambient conditions.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2020 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc. or its affiliates is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Brad street. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

<u>Year</u>	<u>Scale</u>	<u>Details</u>	Source

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Langan Environmental Services were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Subject: [Northbridge MA] Public Records Request - Langan (Sent by Katherine Asciutto, kasciutto@langan.com)

Hello rfitzgerald,

Katherine Asciutto (<u>kasciutto@langan.com</u>) has sent you a message via your contact form (<u>https://www.northbridgemass.org/users/rfitzgerald/contact</u>) at Northbridge MA.

If you don't want to receive such e-mails, you can change your settings at https://www.northbridgemass.org/user/98/edit.

Message:

Good Afternoon,

Langan Engineering and Environmental Services, Inc. is conducting a Phase I Environmental Site Assessment (ESA) of the property located at 44 Cross Street, also identified as the Town of Northbridge Parcel ID 14A-160. Langan is requesting a copy of the official property card for this address. Please let me know if there are any questions. Thank you!

Asciutto, kasciutto@langan.com)

Attachments: SKM_22722092708550.pdf; SKM_22722092708551.pdf

Good Morning – this is all I have on file for this property. Storage tanks will likely be a Fire Department issue.

Jeanne M. Gniadek

Northbridge Board of Health (508) 234-3272

From: Contact form at Northbridge MA <cmsmailer@civicplus.com>

Subject: [Northbridge MA] Public Records Request - Langan (Sent by Katherine Asciutto, kasciutto@langan.com)

Hello jgniadek,

Katherine Asciutto (<u>kasciutto@langan.com</u>) has sent you a message via your contact form (<u>https://www.northbridgemass.org/users/jgniadek/contact</u>) at Northbridge MA.

If you don't want to receive such e-mails, you can change your settings at https://www.northbridgemass.org/user/75/edit.

Message:

Good Afternoon,

Langan Engineering and Environmental Services, Inc. is conducting a Phase I Environmental Site Assessment (ESA) of the property located at 44 Cross Street, also identified as the Town of Northbridge Parcel ID 14A-160.

Langan is requesting any information or copies of files regarding environmental conditions at the site, such as environmental reports, environmental permits, and storage tank information.

Please let me know if there are any questions. Thank you very much!

McConnell Environmenta

A Division of McConnell Enterprises, Ir. 60 Garden Park, Braintree, MA 0213

Telephone: (781) 849-59:

Facsimile: (781) 848-28'

September 14, 2001

Whitinsville Health Department 7 Main Street Whitinsville, MA 01588

Dear Sir or Madam:

McConnell Environmental will be performing asbestos abatement work at the address listed below on (9/18/01 – 9/21/01). The work hours will be 3:00 p.m. 12:00 a.m. Enclosed please find a copy of the Asbestos Notification Form - AN 001.

If you have any questions, please contact our office.

Northbridge Primary School, Cross Street, Whitinsville, M

Sincerely,

Christine Kiriacopoulos

Office Manager

INSTRUCTIONS

1. All sections of this form must be completed in order to comply with the Department of Environmental Protection notification requirements of 310 CMR 7.15. (fen working days prior notification is required of any abalament project; and the Department of Labor and Industries of 453 CMR 6.12. (fun days prior notification is required of ANY abalament project greater than three linear or square loof).

2. Submit Original Form (1) (1) To: (3)

Commonwealth of Massachusetts Asbestos Program P.O.B. 120087 Boston, MA 02112-0087

3. This form may be used for notifying the U.S. Environmental Protection Agency Region Assessor demolition/sevation operations (40 off Subpart M).

Katherine,

The property is not located in any wetland resources or the 100' buffer zone. As such, the Conservation Commission does not have any records, submittals or permits regarding the site.

Regards, Dave

APPENDIX I

Langan Resumes

KATHERINE ASCIUTTO, EIT

SENIOR STAFF ENGINEER

ENVIRONMENTAL ENGINEERING

Katherine Asciutto has experience with environmental engineering projects for industrial, commercial and residential facilities in Massachusetts, Connecticut, New York, Rhode Island, and New Hampshire. She has experience with implementation of large-scale soil management programs, construction oversight and site investigations.

Ms. Asciutto has conducted multiple Phase I Environmental Site Assessments (ESAs), Phase II Environmental Site Investigations (ESIs), and has provided oversight for both environmental and geotechnical soil boring programs. Her expertise include field investigations, which consists of soil, groundwater, and soil vapor sampling, along with report generation and project coordination.
